

Temporary Pacing Leads & Introducers

We offer a range of products for cardiology and cardiac catheterisation labs. These include temporary pacing leads for use with external pacemakers and introducer kits for venous and arterial access.

Bipolar Temporary Pacing Leads

The coaxial design, incorporating stainless steel conductors along the length of the catheter, ensures maximum strength and precise torque control.

- Smooth surface reduces risk of thrombosis
- Clearly defined distal terminal
- Excellent radiopacity
- Size marked on hub
- All available in boxes of 5

Code	Size	Electrode Spacing	Usable Length
Spike LC Pacing Lead with shrouded pins			
52204S	4F	10mm	90cm
52205S	5F	10mm	125cm
52206S	6F	10mm	125cm

Spike LC Pacing Lead with non-shrouded pins, with protective caps

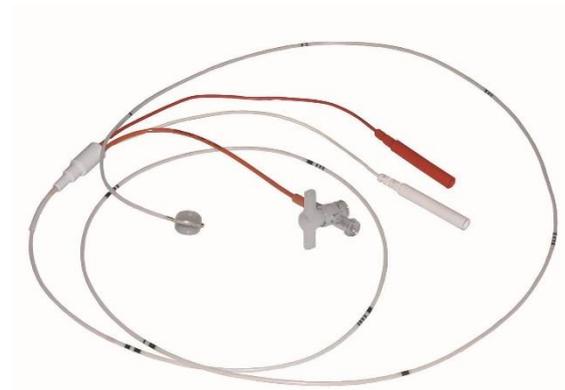

52204N	4F	10mm	90cm
52205N	5F	10mm	125cm
52206N	6f	10mm	125cm

Spike Flow bipolar balloon catheter with shrouded pins

12165	5F	10mm	110cm
-------	----	------	-------

Can be placed easily without fluoroscopy if necessary.

Depth markers at 10cm intervals.

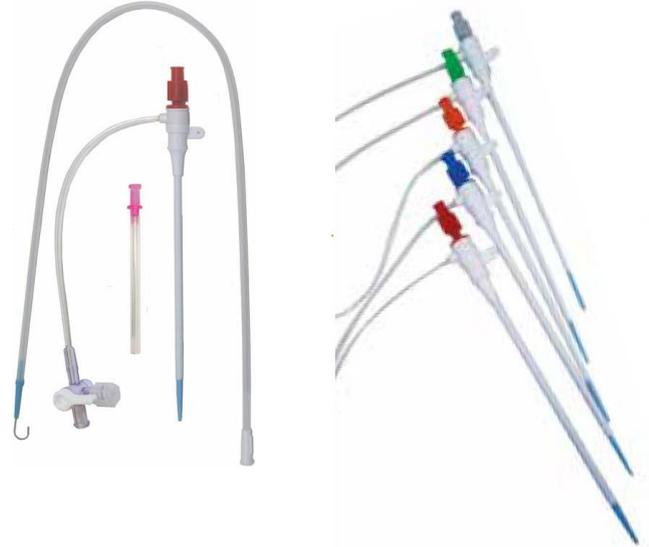

Introducer Kits with Haemostatic Valve

For use in interventional cardiology and electrophysiology procedures including angiography, stenting, atherectomy, temporary pacing, endomyocardial biopsies, trans-septal catheterisation, electrophysiology studies and RF ablations. The haemostatic valve helps to prevent blood loss and embolism.

Kit includes: Introducer with side port, 3 way stopcock and haemostatic valve, dilator, guide wire.

Available in boxes of 10.

Code	Size	Guide wire
F47704V	4F	0.035"
F47705V	5F	0.038"
F47706V	6F	0.038"
F47707V	7F	0.038"
F47708V	8F	0.038"
F47709V	9F	0.038"

Each kit can also be supplied:

- with needle, add "K" to code ref (e.g. F47704VK)
- with needle and syringe, add "SK" to the ref (e.g. F47707VSK)

Peelaway Introducer Kits

This introducer kit allows an easy placement of the pacing leads. The introducer sheath can be pulled back and peeled apart for easier extraction. Also equipped with an interlocking hub.

Kit includes: Introducer with 17cm length dilator, 0.038" guide wire, 18G needle and syringe.

0.035" guidewire and extra long dilators (23cm or 33cm) are available on request.

Code	Size	Code	Size
F47505	5F	F47511	11F
F47506	6F	F47512	12F
F47507	7F	F47513	13F
F47508	8F	F47514	14F
F47509	9F	F47515	15F
