

# Proguard Lead Glasses

Did you know your eyes are four times more sensitive to radiation than other parts of your body?

**Your vision is invaluable – not just to you, but to the patients who rely on your expertise. Why risk it when effective solutions are within reach?**

For any clinician exposed to radiation, whether in interventional radiology, theatres or cardiac cath labs, eye protection is non-negotiable. Advances in design and materials mean that modern lead glasses are tailored to your needs – providing comfort and style.

Prescription lenses are available in most styles, ensuring that you don't have to compromise on vision clarity.

UK law states that radiology professionals' eyes must not be exposed to more than 20 mSv in any calendar year<sup>1</sup>.

Prices from  
**£190**

## Our brands

All glasses are supplied with a hard case, strap and cleaning cloth

## Side Shields

Side shields (either fixed or removable) are an option for many styles. Anti-reflective coating is also available.
